

**LIFT**

The image features a large, stylized logo for 'LIFT' in a vibrant green, metallic font. The letters are thick and blocky, with visible rivets along the edges, giving them a heavy, industrial appearance. The 'L' is particularly prominent, with a silver, metallic arrowhead pointing upwards and to the right, integrated into its base. The logo is centered in the frame, illuminated by a spotlight that creates a bright, circular glow on the dark, reflective floor below. The background is a dark, industrial interior with a high ceiling, where several rectangular light fixtures are visible, casting a soft, ambient glow. The overall mood is one of strength and modernity.

LIFT Safety is a premium industrial products brand that has been redefining safety products and personal protective equipment for over 20 years. Incorporating innovation, performance, function, quality, style, and, above all, protection, has been the goal behind our industry leading carbon fiber hard hats, pro series gloves, and every other product we've designed.

Our roots in protection run deep; EVS Sports, our sister company, designed and created the first ever motocross specific knee brace over 35 years ago. Over time, EVS Sports became the protection leader in the motocross industry with a full line of gear all designed to keep people safe while they do what they love. The founders and staff of EVS chose to carry over the same ideology of 'protection above all else' and venture into the world of personal protective equipment with LIFT Safety in 2004. The same amount of work and dedication that went into creating and building EVS Sports into an action sports protection leader now also goes into everything LIFT Safety does day in and day out. This mindset has helped LIFT Safety become a staple in the industrial safety and personal protective equipment industries.

Protection continues to be the focal point in everything we do, and as LIFT Safety has grown, so have our ambitions. LIFT Aviation, another sister company, began in 2016 that set out to redefine safety equipment and accessories in the general aviation industry. The industry leading technology and innovation that go into LIFT Safety products also go into LIFT Aviation and has helped the LIFT Aviation earn the honor of developing the next generation flight helmet for the U.S. Air Force.

Our team is busy and we have a strong presence in multiple industries with multiple brands, but one thing remains true; protection is at the root of everything we do and we don't intend to stop anytime soon.

A series of diagonal yellow and black hazard stripes at the bottom of the image, indicating a warning or safety zone.

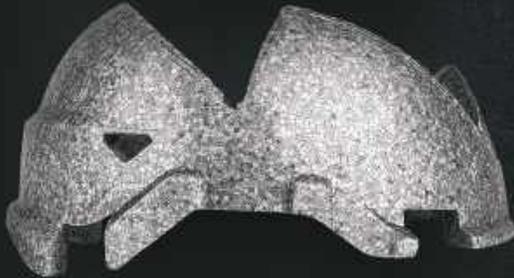

## EXTERNAL SHELL

- High-density ABS external shell provides high impact resistance without the extra weight.

## CROWN IMPACT PROTECTION

- Dual-density polystyrene interior designed to protect against crown impact.

## SIDE IMPACT PROTECTION

- High-density polystyrene interior protects from side, front, and rear impacts.

## LUX SUSPENSION SYSTEM

- LUX attachment system designed to fit securely and comfortably at all times.
- Easy to grip oversized ratcheting dial is easy to grip and use with gloves on.
- Secure four-point connection with easy release magnetic snap lock.

## 1. DUAL DENSITY LINERS

- Complete TYPE 2 protection for crown and side impact, designed with polystyrene blended interior liner.

## 2. AIRFLOW CHANNELS

- Purposefully designed ventilation system channels airflow throughout the helmet for all-day comfort.

## 3. AIR-MESH COMFORT PADS

- High tech antimicrobial fabrics regulate heat and wick away moisture to keep you cool and dry.

## RADIX VENTED

- **12 Ventilation Channels** - Provide enhanced air flow for comfort and breathability.
- **Brim Grip** - Exclusive design provides a secure feel.
- **Oversized Ratcheting Fitment Dial** - Adjust fit with or without gloves on with the easy to grip dial.
- **Integrated Accessory Clips** - Six external built-in attachment points allow compatibility with a wide range of LIFT Safety accessories.
- **Microfiber Antimicrobial Internal Liner** - All day comfort liner designed to be moisture wicking and be easily washable or replaceable.
- **Secure Four-Point Connection** - With easy release magnetic lock.
- **One Size Fits Most** - Standard Head Size 6 ½ - 8 (52-64 cm head circumference).

## FORGED CARBON DAX

FEATURING Mips® safety system

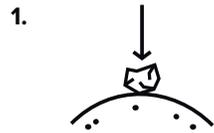

Experience ultimate safety and comfort with the Forged Carbon DAX Hard Hat. Crafted with a forged carbon shell, it's 25% lighter for reduced fatigue. The MIPS® safety system reduces rotational force, offering unmatched protection. The LUX Suspension System ensures a secure fit. Gear up for durability, innovation, and peace of mind on the job.

- **Forged Carbon Shell** – Unique carbon fiber layup techniques make each hard hat a one-of-a-kind design that is also 25% lighter than the original DAX carbon fiber hard hat.
- **Mips® safety system** – Providing exceptional protection, The Mips® safety system features a low-friction layer inside a safety helmet or hardhat that allows a multi-directional movement of 10-15mm on certain angled impacts, intended to help reduce rotational force to the head.
- **Moisture-Wicking Brow Pad** – Crafted from synthetic plush padding, this innovative design ensures day-long comfort while effectively preventing sweat from dripping into your eyes.
- **Retention System** – Using our uniquely designed LUX Suspension System to provide better retention. The ratcheting fitment dial allows for rapid head size adjustment and is easy to grip and manipulate with gloves on. The ratcheting system lies on the occipital lobe, providing stability and comfort.
- **Brim Grip** – A staple feature on all our premium hard hats is designed to provide a better grip.
- **Certifications** – ANSI, TPYE I, CLASS C / EN 327, Hard hat shell has been tested to radiant heat loads producing temperatures up to, but not exceeding, 350° F (177° C), Using this hard hat with a chin strap does not meet ANSI, Type II certification.

### How Mips® safety system works with LIFT industrial safety hard hats & helmets.

CENTER CROWN

Industrial helmets are typically designed for centered crown impacts, but most impacts are off-centered or angled which can cause rotational motion to the head.

OFF-CENTER

The Low Friction Layer is intended to help reduce the rotational motion to the head in certain off-centered or angled impacts.

FALL

The rotational motion can cause brain injuries.

## NOISE CONTROL NEW 25DB HEARING PROTECTION

Our noise control hearing protection passively blocks noise by relying on the insulating materials of the ear cups to dampen sound. The dielectric construction makes them safe for all environments including electrical applications. Comfortable cups and low pressure make them comfortable for all-day wear.

- **25DB** Passive Noise Reduction Rating.
- **Spring Design** - Unique design delivers a low pressure and comfortable platform.
- **Modular** - Three distinct wearing positions for ease of use with multiple ear cup height adjustment to accommodate different ear sizes.
- **Large Ear Cups** - Allow the ears to easily fit inside the cups and make for easy adjustment even when wearing gloves.
- **Soft Ear Cup Material** - Allows extended wear without discomfort.
- **Retain The Class E Dielectric Rating** on the RADIX Non-Vented and BRIGGS Non-Vented.
- **DAX Mounting System** - \*Sold Separately.
- **Sold as Pair.**

A blurred background image of an industrial worker wearing a white hard hat and a blue shirt, working on a piece of machinery. The scene is brightly lit, suggesting an outdoor or well-lit indoor industrial environment. The worker is positioned in the upper right quadrant of the frame, leaning over their work. The machinery is red and black, with various pipes and components visible. The overall tone is industrial and professional.

# GLOVES

WORKMAN - DISPOSABLES - PRO-SERIES

# PRO-SERIES GLOVES

Pro Series Gloves are designed and engineered to be task specific with options ranging from general purpose to industry specific labor.

1

TPR Knuckle Guard - Enhanced finger coverage for added protection

2

Perforated Leather - Perforated genuine leather provides rugged strength and breathability

3

Touch Screen Finger Tip - Coated with advanced touch conductive material to enable you to flawlessly manipulate a touch screen device

4

Strap Closure - Velcro TPR closure for a secure fit

5

Leather EVA Padded Palm - Made to protect you from rough surfaces and other hazardous elements

# TACKER

The Tacker glove is made from heavy-duty genuine leather and designed for superior abrasion resistance.

- Genuine leather reinforcements on the palm, saddle, fourchettes and fingertips for impact and vibration absorption.
- EVA padded palm for impact and vibration absorption.
- TPR knuckle impact protection.
- Embossed airprene comfort cuff.
- Touch screen finger tip.
- Machine washable genuine leather for maximum abrasion resistance.
- TPR wrist closure.

# KNEE PROTECTION

KNEE GUARDS - ANTI-FATIGUE

# APEX GEL

The Apex Gel, our most popular knee pad, is designed to provide the best of both traction and comfort for your knees.

**1** TPR - Knee cap maximizes traction and stability on all surfaces.

**3** Ballistic Nylon - construction resists abrasion for increased durability.

**2** Apex Gel - Insert forms to patella and knee cap to maximize stabilization and protection.

**4** Adjustable - Two strap design allows for the perfect fit and prevents slipping.

# APEX

## GEL KNEE PAD

- Hinged upper support strap prevents binding.
- Fully adjustable two strap design resists slipping.
- Textured TPR knee cap maximizes traction and stability on all surfaces.
- Internal gel insert forms to patella and knee cap maximizing stabilization and protection.
- Ballistic nylon construction resists abrasion for increased durability.
- Designed to prevent “roll-off” on hard surfaces.
- Available in a soft shell (Apex Gel) and a hard shell (Apex Hardshell and Apex Non-Marring).
- One size fits most.

# CUSTOM FORCE

## WE'LL DESIGN FOR YOU

### DO YOU HAVE A PRODUCT IDEA?

We provide access to our product development lab to co-develop a product that 100% meets your needs: YOUR idea, OUR developers, and with the legendary LIFT quality built in from the start.

### ABOUT THE LAB

LIFT Custom Force is a product problemsolver that enables you to come up with a custom solution to your specific safety product needs. Do you need a glove that performs better than anything currently available for your specific application or do you need a protective eye-wear that is comfortable, but has a unique feature that you haven't found yet in the market?

### HOW THE PROGRAM GOT STARTED

Backed by over 30 years of safety innovation, LIFT is proud to announce it's Custom Force program.

In 2006 Lift Safety was approached by Precision Drilling to design and develop a glove that would reduce or potentially eliminate one of the more common work related injuries for hand injuries. Over the course of 16 months, a series of prototypes, and more than 25,000 hours of field testing resulted in a glove that went beyond Precision Drilling's expectations. In July 2008 Precision Drilling received their first production shipment and implemented the Rigger Glove into their safety program.

### ARE YOU INTERESTED?

For more information contact us at [customforce@liftsafety.com](mailto:customforce@liftsafety.com) or you Area Sales Manager for more details.
